Preface	V
----------------------	---

Computers Architecture

Improving the dependability of dynamically reconfigurable hardware by concurrent replication of active resources	3
<i>José Martins Ferreira and, Manuel G. Guericota</i>	

Execution Time Comparison of Algorithms for The Assignment of Real Time Task for Multiprocessors	13
<i>Héctor Silva and Sergio Suárez</i>	

A Soft Methodology for On-Chip Multiprocessor Design	24
<i>Alejandro Matute, Marcos de Alba, and Elias Mizan</i>	

Register file optimization for low power using the zero detect technique	35
<i>Moisés A. Zárate, Luis A. Villa, Oscar Camacho N. and Osvaldo Espinosa Sosa</i>	

Digitally Programmable Analog Instrumentation Module for Processing Vital Signs	46
<i>Sandra Díaz Pier and Marco R. de Alba R.</i>	

Digital Signal and Image Processing

Environmental Sounds Recognition System Using the Speech Recognition System Techniques	57
<i>Omar Aranda, Hector M. Pérez, Mariko Nakano</i>	

Fuzzy De-noise of ECG signals with wavelet Techniques ...	66
<i>I.S.Razo Z, L.E. Ramos V and J.W. Vilanova</i>	

Best basis selection for image compression using cellular automata transforms	76
<i>Juan E. Paz</i>	

Wavelet Domain Order Statistic Filters for image Denoising
J. Martínez V., F. J. Gallegos F. and Volodymyr Ponomaryov

Virtual Instrumentation and Digital System Design

Microcontroller-Based Distributed Serial Communication and
PC-Based Supervision and Control for an Automated
Greenhouse
*V. López, L. E. Muñoz, L. A. Paredes, J. Romero G, América
S and J. A. Sanchez H.*

Design of a Nanosatellite Laboratory Model as a Proof of
Concept for a Future University Space Mission
Esaú Vicente-Vivas, Jorge L. Morales and Arturo Rueda

Preliminary Design of the Power Subsystem for a University
Nanosatellite
Esaú Vicente-Vivas and Jorge Morales

Design and implementation of a Robotic Arm Able to Play
"TIC-TAC-TOE" controlled by a FPGA
Norma E. Chávez, F. Arámbula Cosío, et al.

Real Time Systems

Real-Time Constraints for Digital Filters to Parameters
Estimation on monovariale Linear stochastic Systems
J. J. Medel, P. Guevara-López, D. Cruz-Pérez

Matricial Estimation of Start Times with Stochastic Behavior
of Periodic Real Time Tasks in a Concurrent System
*P. Guevara López, D. Cruz Pérez, J. J. Medel and A. Flores
Rueda*

Control

Diagnosis of a nonlinear system with stabilizing control
J. C. Cruz-Victoria and R. Martínez Guerra

Fault Diagnosis Methods for AC induction Motors
Rodrigo López and Luis Pastor

Generator of unidirectional irregular wave with linear motor and supervised neural control	170
<i>Luis Pastor S. , Roberto Herrera C. and Oleksiy Pogrebnyak</i>	
Using Neural Networks in the Estimation of Consonant Imprecision Rating	179
<i>C. A. Ferrer, A. del Toro, E. González and Maria E. Hernández</i>
