Page/Pág.

Knowledge Representation and Logic

XML based Extended Super-function Schema in Knowledge Representation	3
<i>Qiong Liu, Xin Lu, Fuji Ren and Shingo Kuroiwa</i>	
The Description Logic of Tasks	13
<i>Zhang Hui and Li SiKun</i>	
A Logic Programming Formalization for Circumscription.....	23
<i>Masahiko Arai</i>	

Constraint Satisfaction

Genetic Algorithms for Dynamic Variable Ordering in Constraint Satisfaction Problems	35
<i>Hugo Terashima-Marín, René de la Calleja-Manzanedo and Manuel Valenzuela-Rendón</i>	
Two Hybrid Tabu Scatter Search Meta-heuristics for Solving MAX-SAT Problems.....	45
<i>Dalila Boughaci, Drias Habiba and Benhamou Belaid</i>	
Complete Instantiation Strategy for Approximate Solution of TCSP55	55
<i>Priti Chandra and Arun K. Pujari</i>	
Graphplan Based Conformant Planning with Limited Quantification	65
<i>Alan Carlin, James G. Schmolze and Tamara Babaian</i>	

Multiagent Systems and Distributed AI

A Distributed Multiagent Workflow System	79
<i>Cesar Marin and Ramon Brena</i>	

Cooperation in multirobotics environments	89
<i>Félix Orlando Martínez Ríos and Carlos Rodríguez Lucatero</i>	
Economics of Cooperation : Social Foraging in Distributed Systems	99
<i>Ashish Umre and Ian Wakeman</i>	

Computer Vision and Pattern Recognition

Some Experiments on Corner Tracking for Robotic Tasks	111
<i>Victor Ayala-Ramirez, Cruz A. Longoria-Mendez and Raul E. Sanchez-Yanez</i>	
Pattern Decomposition and Associative Processing Applied to Object Identification.....	121
<i>Benjamín Cruz, Humberto Sossa and Ricardo Barrón</i>	
Object Classification Based on Associative Memories and Midpoint Operator.....	131
<i>Roberto A. Vázquez, Humberto Sossa and Ricardo Barrón</i>	
Associative Processing Applied to Word Reconstruction in the Presence of Letter Scrambling	141
<i>Humberto Sossa, Ricardo Barrón and Benjamín Torres</i>	

Machine Learning and Neural Networks

Hybrid strategies and meta-learning: an inquiry into the epistemology of artificial learning	153
<i>Ciro Castiello and Anna Maria Fanelli</i>	
Comparison of Neuro-Fuzzy Systems with a Defuzzification-Based Algorithm for Learning Fuzzy Rules	163
<i>Jean Saade and Adel Fakih</i>	
Evolutionary Computation and Genetic Algorithms Intelligent Genetic Algorithm: A Toy Model Application	175
<i>Jaime Mora Vargas, Neil Hernández Gress and Miguel González Mendoza</i>	

Improved Ant Colony System using Subpath Information for the Traveling Salesman Problem.....	185
<i>Minyoung Yun and Inkyeom Kim</i>	

Building Block Filtering Genetic Algorithm	195
<i>Jun Lu, Boqin Feng and Bo Li</i>	

Evolutionary Training of SVM for Classification Problems with Self-Adaptive Parameters.....	207
<i>Angel Kuri-Morales and Iván Mejía-Guevara</i>	

Natural Language Processing

Language Portable Detection for Spanish Named Entities	219
<i>Zornitsa Kozareva, Oscar Ferrández, Andrés Montoyo and Rafael Muñoz</i>	

Boosting Applied to Spanish Word Sense Disambiguation.....	229
<i>Rocio Guillen</i>	

A Cognitive-Based Approach to Adaptive Intelligent Multiagent Applications	239
<i>Charles Hannon</i>	

Modeling and Intelligent Control

Orthogonal-Back Propagation Hybrid Learning Algorithm for Interval Type-2 Non-Singleton Type-2 Fuzzy Logic Systems	251
<i>Gerardo M. Mendez and Luis A. Leduc</i>	

Characterization and Interpretation of Classes Based on Fuzzy Rules in ill-Structured Domains	261
<i>Fernando Vázquez and Juan Luis Díaz de León</i>	

Differential Evolution Algorithms to Solve Optimal Control Problems Efficiently	271
<i>Irineo L. Lopez-Cruz and Abraham Rojano-Aguilar</i>
