

This volume contains 27 carefully selected papers by 75 authors from 7 countries: France, India, Japan, Mexico, Spain, Tunisia, and USA. These papers present the most recent developments in a range of areas related to computer science and engineering. The papers are arranged into 7 thematic fields:

- Algorithm Theory
- Neural Networks and Optimization
- Image Processing
- Natural Language Processing and Knowledge based Systems
- Robotics
- Computer Networks and Web Services
- Software Engineering

The volume will be useful for researchers, students, and general public interested in the corresponding areas of computer science and engineering.
