

## Table of Contents

|                                                                                                                   | Page |
|-------------------------------------------------------------------------------------------------------------------|------|
| Fractal Predictor of the Dynamics of Bitcoin Fluctuations by Using Self-Affine Time Series.....                   | 5    |
| <i>Jaime Moreno, Oswaldo Morales, Ana Lilia Coria, Ricardo Tejeida, Liliana Chanona</i>                           |      |
| A Statistical Prediction of COVID-19 Behavior in Mexico .....                                                     | 17   |
| <i>Seyed Habib Hosseini Saravani, Sara Besharati, Ponciano Jorge Escamilla-Ambrosio, Alexander Gelbukh</i>        |      |
| A Comparative Study on the Effectiveness of Naïve Bayes Classifiers in Spam Filtering .....                       | 25   |
| <i>Sara Besharati, Seyed Habib Hosseini Saravani, Alexander Gelbukh</i>                                           |      |
| Data Augmentation vs Regularization for Time Series Forecasting.....                                              | 39   |
| <i>Juan J. Flores, Miguel A. Reynoso, Josué D. González, Felix Calderon</i>                                       |      |
| Semantic Improvements to MPEG-7 Descriptors for Content-Based Image Retrieval.....                                | 47   |
| <i>K. Salvador Aguilar Domínez</i>                                                                                |      |
| Detecting Mental Disorders in Social Media using a Multichannel Representation .....                              | 53   |
| <i>Mario Ezra Aragón Saenzpardo, Adrián Pastor López Monroy, Manuel Montes y Gómez</i>                            |      |
| Data-driven Methodology for Candidate Well Selection and Ranking .....                                            | 59   |
| <i>Héctor De Paz Galicia, Eduardo Roldán Reyes, Leonid Sheremetov</i>                                             |      |
| Development of a Metaheuristic to Obtain Frequent Similar Patterns .....                                          | 63   |
| <i>Gretel Bernal-Baró, Ansel Y. Rodríguez González, Rosa M. Valdovinos Rosas</i>                                  |      |
| Graphs to Face the Class Imbalance Problem in Big Data .....                                                      | 67   |
| <i>Angélica Guzmán-Ponce, R.M. Valdovinos-Rosas, Josep Salvador Sánchez-Garreta, José Raymundo Marcial-Romero</i> |      |
| Incremental Learning Models for Identifying Imagined Words in Continuous EEG Signals .....                        | 73   |
| <i>Tonatiuh Hernández-del-Toro, Carlos Alberto Reyes-García</i>                                                   |      |

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| Cellular Evolutionary Algorithms with Estimation of Distribution.....                                            | 77 |
| <i>Yoan Martínez-López, Julio Madera, Ansel Rodríguez</i>                                                        |    |
| Cybersecurity on Transactions in Smart Metering Systems Using<br>Blockchain.....                                 | 83 |
| <i>Juan C. Olivares-Rojas, Enrique Reyes-Archundia,<br/>José A. Gutierrez-Gnecchi</i>                            |    |
| A Multilayered Model based on Blockchain that Forti es the Integrity and<br>Security of Public Information ..... | 89 |
| <i>Fernando Rebollar, Roco Aldeco-Perez, Rosa M. Valdovinos,<br/>Marco A. Ramos</i>                              |    |
| COVID-19 on the Time, Mexico and the World .....                                                                 | 95 |
| <i>Juan J. Martínez, Ildar Batyrshin, Alexander Gelbukh</i>                                                      |    |
